

# How to get a Google Map API Key without a billing account?

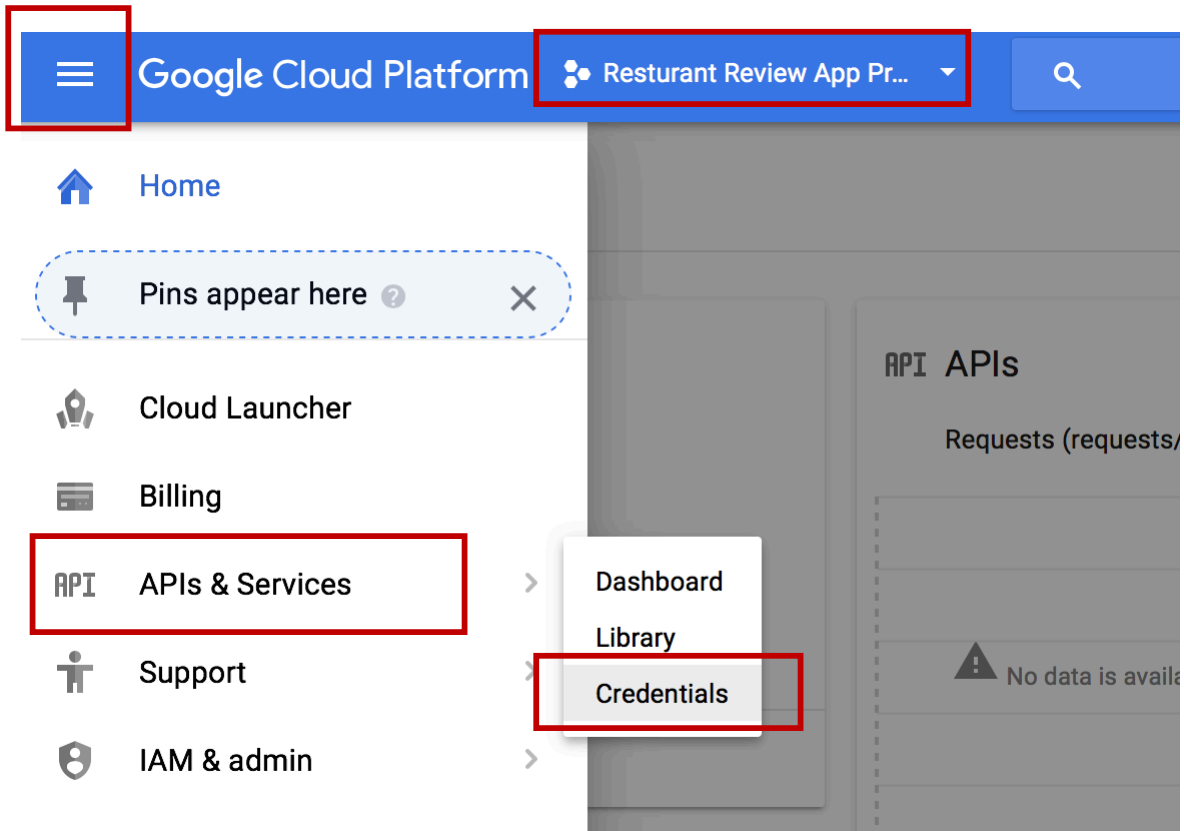

1- Access Google Map console and log in by using your gmail account

<https://console.cloud.google.com/home/>

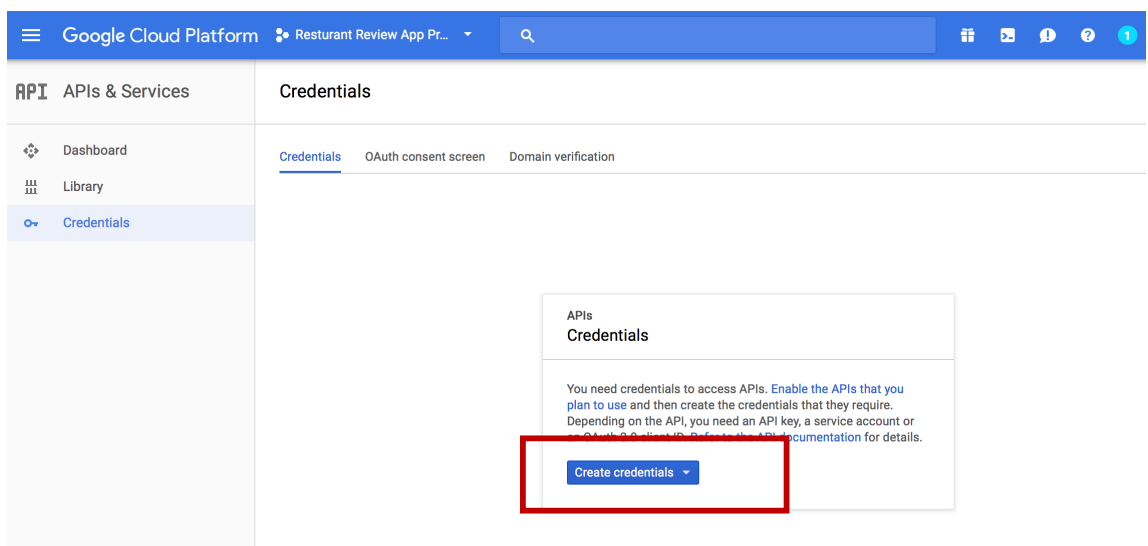

2- Create a new project from console

### 3- From Home → left side menu → APIs & Services → Credentials

### 4- Create credentials. In case it asks you to enable a project plan, please choose “Google Map JavaScript API”.

## Credentials

[Credentials](#)

[OAuth consent screen](#)

[Domain verification](#)

### API key

Identifies your project using a simple API key to check quota and access.

### OAuth client ID

Requests user consent so your app can access the user's data.

### Service account key

Enables server-to-server, app-level authentication using robot accounts.

### Help me choose

Asks a few questions to help you decide which type of credential to use
